Professional Summary

Motivated and detail-oriented BCA student with a strong foundation in full-stack web development, data structures, database systems, and machine learning. Experienced in building scalable web applications using React, Next.js, Node.js, and modern databases, along with developing ML models and exploring data science techniques for real-world problem solving. Passionate about continuous learning, analytical thinking, and applying technology to create impactful solutions.

Education

ST. FRANCIS COLLEGE, Bengaluru City University Aug 2023 – Aug 2026
Bachelor of Computer Application (BCA), CGPA: **8.88**

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion
Backend: Node.js, Express.js, REST APIs, Python, FastAPI, Prisma ORM, Redux
DataScience and ML: Python(Numpy, Pandas, Sckit-learn, Matplotlib, Flask and Other Liberaries), Excel, Google Sheets
Cloud & DevOps: Firebase, AWS, Google Cloud Platform, Vercel, Cloudflare, Render
Databases: MongoDB, MySQL, PostgreSQL, Supabase
Tools: Git, GitHub, Postman, Chrome DevTools, VS Code, Cursor, n8n
Other: API Design, Authentication & Authorization, CI/CD Pipelines, Technical Documentation.

Experience

Lead Application Developer Intern, Cloud Institution, Bangalore (Onsite) Apr 2025 – Jul 2025 • Owned the end-to-end delivery of a production-grade Learning Management System using Next.js, TypeScript and Firebase, supporting **3+ user roles** with role-based access control.

- Engineered **10+ core features** including authentication, attendance tracking, batch queries, and real-time data synchronization using REST-based backend APIs.
- Operated and maintained the platform for **100+ students and faculty** across **2 edtech branches**, sustaining **99.9% uptime**.
- Automated attendance workflows using QR-based scanning, reducing manual processing time by **80%** through optimized Firebase batch operations.

Projects

MedBlock – A Medical Report Tracking Framework
GitHub | Live Demo

- Led the development of a full-stack research platform that allows researchers to upload and publish academic content with AI-driven summarization and validation.
- Built secure RESTful APIs with token-based authentication and implemented intelligent document processing using React and Node.js. Deployed the scalable application on Vercel and Render to support collaborative, data-driven research insights.

NextHire.AI - Resume Classification & Career Recommendation System

GitHub | Live Demo

Machine Learning | NLP | Flask | Deployment

- Developed an NLP-based resume classification system using TF-IDF and Logistic Regression.
- Built end-to-end ML pipeline including preprocessing, model training, and inference.
- Created Flask REST APIs integrating AI predictions with frontend interface.
- Implemented resume builder with multiple templates and PDF export functionality.
- Added intelligent job recommendation and interview question suggestion features.
- Successfully deployed a production-ready ML web application.

Certifications & Achievements

- Completed Full Stack Development course from Apna College and DataScience + ML course from CodeWithHarry
- Completed Basic Cloud Computing and devOps from
- Solved 10+ DSA Leetcode questions.
- Got 1st place in a Hacker rank coding competition conducted by our college.
